About Project

Our Project is based on habit tracker, we named it ' Habito '. If you want to stick with a habit for a good health, one simple and effective thing you can do is to keep a track of your habits. Habit tracker is a simple way to measure whether you completed your habit or not.

- Habito reminds you to act.
- Habito prompts you to take action via notifications we have set-up for the application.
- Habito encourages you to keep up with your routine by setting goals, for this you have to maintain your streak.
- Habito offers quick satisfaction. Seeing your result will ultimately make you feel good and happy and more inclined to stick with anything.
